

ABHINAV THAKUR

Software Development Engineer | Full Stack Developer | Cybersecurity Researcher
abhinav2005thakur@gmail.com | +91 7428203457 | New Delhi, India 110037 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA: 8.7/10) with experience in full-stack development using React, Node.js, FastAPI, and SQL/NoSQL. Frontend Developer intern, Springer-published researcher, and solved 200+ LeetCode DSA problems. Seeking a Software Development internship to build scalable applications.

TECHNICAL SKILLS

Languages:	C++, Python, JavaScript, SQL
Frontend:	React.js, Tailwind CSS
Backend:	Node.js, REST API, Express.js
Databases:	MongoDB, SQLite
Tools & Deployment:	Git, Render, Vercel

RESEARCH & PUBLICATIONS

Undergraduate Research Assistant — Deep Learning for IoT Analytics Publish ↗ 2025
Dronacharya College of Engineering, Gurugram, India

- Co-authored a research paper on deep learning techniques for IoT analytics, accepted and presented at the ICT4SD International Conference 2025 and published by Springer.
- Conducted data collection, model development, and performance evaluation, contributing to 1 peer-reviewed publication.

PROJECTS

Centralized Application-Context Aware Firewall (CAFW)
FastAPI, React.js, Node.js, PostgreSQL, JWT, SQLite, Vite

- Built a real-time Web Application Firewall in FastAPI middleware that detects and blocks SQL Injection (SQLi) and Cross-Site Scripting (XSS) attacks via context-aware, endpoint-specific request validation across all API routes.
- Developed a React.js monitoring dashboard with REST API integration for real-time attack logging, analytics visualization, and automated penetration-testing simulation scripts.

Stock Valuation System — Indian Listed Companies LIVE
Python, yfinance, Yahoo Finance API, HTML/CSS/JavaScript

- Engineered a modular Python valuation engine combining 5 investment frameworks (Buffett Value Investing, Lynch GARP, Graham Deep Value, DCF, and Sector Analysis) into a composite 0–100 scoring system with a two-stage 10-year DCF model for 65+ NSE/BSE equities.
- Built a zero-dependency local web dashboard (Python stdlib + vanilla HTML/CSS/JS) with real-time search, sortable comparisons, and a 24-hour JSON caching layer for sub-second queries.

Developer Utilities Suite — React Frontend Applications LIVE
React.js, Tailwind CSS, JavaScript, Rapid API

- Built a multilingual text translator integrating a third-party translation API with asynchronous calls, real-time state management, and dynamic UI rendering in React.js to support 10+ languages.
- Developed a configurable random string generator using React hooks (useState, useEffect) with 4 character-set options, custom length controls up to 128 characters, and one-click clipboard copy.
- Implemented multi-page client-side routing via react-router-dom and built a responsive UI clone using React.js and Tailwind CSS, replicating layout, navigation, and course card sections.

EDUCATION

Bachelor of Technology — Computer Science & Engineering 2023 – 2027
Dronacharya College of Engineering, Gurugram University, Gurugram, Haryana | CGPA: 8.7 / 10

Heera Public School, Samalka, New Delhi, Delhi

CBSE Senior Secondary (12 th)	2023
CBSE Secondary (10 th)	2021

CERTIFICATIONS & ACHIEVEMENTS

- Compiler Design — Elite + Silver Medal (69%), NPTEL Certification, 2026
- Maintained CGPA of 8.7/10 while engineering two independent production-grade software projects.
- Solved 200+ DSA problems on LeetCode covering arrays, trees, graphs, and dynamic programming.
- Full-Stack Development – Udemy
- Backend – Coursera (Meta)
